

Application Deployment and High Performance Computing Branch (ADHPCB)

High Performance Computing Use Policy Agreement

The undersigned user has read and agrees to the following policies relative to the use of HESC computing resources:

- 1) User agrees to use HESC systems only for the purpose described in the resources allocation request made for the user's project. Any intended use beyond what is prescribed by the resources allocation request must be approved by the HESC General Support System (GSS) Manager, Corei Somerville.
- 2) User agrees not to share any accounts or passwords. All passwords are to be kept secret (known only to the authorized user) and shall not be kept anywhere in clear text on EPA computing systems, including in an alias or script.
- 3) User agrees to respect the confidentiality of other users' data: user shall not attempt to access or use accounts, files, data, or information of another HESC user, unless specifically authorized by the other user or the Principal Investigator (PI) of the other user's project. If any user obtains access to accounts, files, data, or information of another HESC user, he or she shall treat them as confidential and shall not use or further disclose such data or information to other users or any other person, except with the explicit permission of the owner of the data or information.
- 4) User acknowledges that HESC systems are used by many different users, and user therefore agrees to take appropriate precautions to protect his or her data and files from unauthorized access. The user shall coordinate all such actions with the Principal Investigator (PI) of the user's project. The user or the PI shall contact HESC staff if they have any concerns or uncertainties as to what precautions can and should be taken.
- 5) User agrees not to place any sensitive information, such as social security numbers, bank account numbers, etc., on HESC computer systems.
- 6) User agrees to notify the EPA Call Center if the user observes or experiences any incident or behavior that in the user's view could constitute a threat to the security of the HESC GSS or any associated system and network, including violations of the policies explained above. The EPA Call Center (866-411-4372) is staffed Monday-Friday, 6:00 am-6:30 pm (ET). Call Center staff is not trained on the HESC systems but may be able to direct your call to an HESC staff member. When the Call Center is not in service, operations problems may be directed to the NCC operators at 919-541-1112. Additionally, if desired, HESC HPC staff may be reached using the e-mail address hesc.support@epa.gov.
- 7) User agrees to comply with the security rules and policies established by HESC and US EPA. HESC will provide a copy of these rules and policies to the user upon creation of the user's account and will inform users promptly of any change that requires the user's attention.
